

We are pleased to announce a new and unique service to our product portfolio - iNsiGht. This innovative, interactive tool is available via our website (www.selden.co.uk).

Following a simple registration process, the user will be able to create training packages, safety notices, wallcharts, task charts, task cards, cleaning schedules and more... All of these services are available entirely free of charge and are highly customisable. The information included within these documents is bespoke - tailored to the end users requirements.

iNsiGht follows a similar principle to Flagship, in that the user must create a site and assign products in use. With this information iNsiGht can build complete MSDS packs, product information kits, charts, training guides etc. Taking this one step further, if the user states what tasks are being performed with each product, iNsiGht is able to produce step-by-step wallcharts, cleaning schedules and task cards. Everything output from iNsiGht will have the user/clients details on - completely personalised.

COSHH+ Promoting the Safe Use of Chemicals in Cleaning

Via the iNsiGht system, the user can define single or multiple sites (cleaning locations). Products that are used on these sites are assigned via a simple selection tool. Once all required products are specified a single click of the mouse creates a full training kit; handouts for the operators, safety notices, wallcharts etc. All of which are specific to the site. The training kit focuses on the hazards, risks and procedures relating to the products in use. Of course, information regarding the full spectrum of hazards and risks is provided, but emphasis is placed on the safe use of the chemicals the operative will be using.

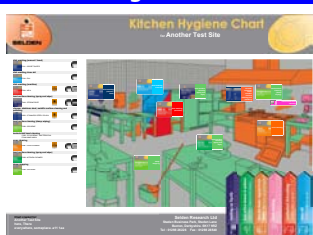

The COSHH+ Kit
Operator Handout - safety advice,
COSHH awareness,
product guides
Safety Notices
Wallcharts
Trainer Guidance notes

keynotes

availability	Visit http://www.selden.co.uk/insight
overview	iNsiGht provides all users with the means to create personalised, bespoke documents to support Selden branded products.
features	MSDS library - by cleaning location, with the added function of a 'cleaners cupboard' version. In essence a single document containing all safety data sheets. Product Guides - product information, again personalised and packaged up for each given cleaning site. COSHH+ Kit - Complete COSHH awareness and product training manual, ideal for staff training (includes the ability to create certificates!) Wallcharts - area cleaning charts full step-by-step wallcharts in A4 and A3 paper sizes. Task Cards / Schedule - individual task cards and cleaning schedule notices for cleaning zones within a site.

Cleaning Area Charts - visual aid for product selection and task guidance

iNsiGht provides task templates for common cleaning areas; kitchen, washroom, poolside cleaning, gymnasiums and more. Simple specify which of the tasks you wish your cleaning operators to perform in any given area and select which chemicals to use and the system instantly generates high quality A3 and A4 sized wallcharts. These charts include relevant hazard symbols and PPE requirements.

Advanced Task Management - customisable task driven cleaning system

For those users wanting even more operator guidance, iNsiGht incorporates an advanced task management section. This requires the user to specify which tasks any given product is used for on their site(s). By providing this additional information (with the option of specifying frequency of the cleaning task), the system can create bespoke job cards, a cleaning schedule and step-by-step wallcharts. The task names, descriptions, images and even additional task notes are all completely customisable. The user can even upload their own photographs and company logos to be included on the various documents.

requirements

- internet enabled pc**
Any desktop pc equipped with an internet connection and a recent web-browser (Microsoft Internet Explorer v5.0 or greater, Mozilla Firefox, Mac OSX Safari, Google Chrome). A broadband connection is recommended.
- selden products**
Only Selden branded products are included within iNsiGht.
- adobe acrobat reader**
All documents are supplied as 'pdf' format and therefore require a suitable reader. Adobe Acrobat Reader is available, free of charge, from the Adobe website <http://www.adobe.com/go/getreader/>
- cost of service**
iNsiGht is provided entirely free of charge to all Selden distributors, sub-distributors and end users. The service does require registration - a quick and simple process
